EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul A. Levy on June 2, 2008.

The application has been amended as follows: The abstract will be replaced with the following new abstract:

A collapsible type optical unit is described that is capable of moving its optical system between a working position and a retracted position as well as an image-pickup apparatus including the optical unit. The optical unit and the image-pickup apparatus are capable of acquiring lens-position information by detecting a position of a lens barrel supported to be movable with respect to a fixed barrel. The collapsible type optical unit includes a second group lens frame movable along a direction of its optical axis with respect to a fixed ring and rear barrel, and a solid-state image-pickup device provided behind the second group lens frame, in which on the movable second group lens frame, a position-detecting means for detecting a position of the second group lens frame is provided.

Drawings

The following changes to the drawings are required by the examiner and must be made by applicant:

The last page of the Drawings contains a "Description of reference symbols", which is not a Drawing and therefore should not be apart of the "Drawings". Applicant needs to add the "Description of reference symbols" to the Specification. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d).

In order to avoid abandonment of the application, applicant must make these above drawing changes.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claim 10 has been found to be allowable because the prior art of record either alone or in combination neither discloses nor makes obvious the optical unit of a collapsible type comprising the particular feature of position-detecting means provided within the fixed barrel, in combination with the particular feature a position of the zoom lens frame being detected by the position-detecting means between the collapsed position and wide position and the particular feature of the position of the zoom lens frame not being detected by the position-detecting means between the wide position and the telephoto position, further in combination with the other particular combination of features recited in claim 10.

Claims 11 and 12 have been found to be allowable because they depend from claim 10.

Claim 13 has been found to be allowable because the prior art of record either alone or in combination neither discloses nor makes obvious the image-pickup apparatus comprising the particular feature of position-detecting means provided within the fixed barrel, in combination with the particular feature a position of the zoom lens frame being detected by the position-detecting means between the collapsed position and wide position and the particular feature of the position of the zoom lens frame not being detected by the position-detecting means between the wide position and the telephoto position, further in combination with the other particular combination of features recited in claim 13.

Claim 14 has been found to be allowable because they depend from claim 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
